Introduction to the Philosophy of Science:

The Recitation

Recitation Instructor: Bryan Roberts

Office Hours: W Th 3:30 – 4:30

Meeting Times:

You are expected to come to your scheduled recitation weekly. If for some reason you miss recitation, please try to make it up at one of the other scheduled times:

<i>Monday</i>	1:00-1:50	CL 129
<i>Tuesday</i>	12-12:50	Pubhl A522
	2-2:50	IS 404
<i>Wednesday</i>	1-1:50	CL 121

Your Job:

You are expected to **1)** participate in discussion section each week, **2)** turn in two satisfactory papers of your own work, and **3)** pass two exams. It's that easy! This section is your opportunity to discuss course material in a more personal setting, to bring your particular difficulties into focus, and to learn something extra about the philosophy of science.

Some Notes on Papers

There are a few rules about turning in papers that must be followed. If you are not able to attend class on a day that a paper is due, you must turn it in early. **Late papers will not be accepted.**

In addition, papers will only be accepted if they adhere to the proper formatting: Times New Roman font, size 12, 1.5 spacing. Citations should be given a page separate from your paper and not included in the number of pages called for—that is, you must turn in a 3-5 page paper *plus* a citations page. All citations must follow the Chicago Style of reference, which you should be able to Google with ease. Your papers will all be graded according to the same grading key, which I will hand out and discuss in the coming weeks.

I offer exactly one re-grade for anyone who asks. Just remember that a re-grade is just that – it could go up or down. Re-grades must be requested within one week of the day your exam is handed back to you, without exception.
