Front Matter

Dedicated to

Lucy Poole

Bernard's mother, 97 years young, February 15, 2006

Anne Giorgio

Marilyn Giorgio-Poole's mother, 91 years young, December 23, 2006

Marilyn Giorgio-Poole, PhD

Bernard's wife, whose dogged determination to complete a task once begun has inspired him in the completion of many a tough task, including this book

Zsolt Poole

Marilyn and Bernard's son, who is busy completing a significant task of his own just now as he nears completion of his Masters' degree in Electrical Engineering at the University of Pittsburgh

John McIlvain, Willa Sky Bacon

and every teacher and administrator who looks to the 21st Century

John Mark Jackson, husband

I love you and yes,
we'll write an Office X for Mac book eventually...

Amy Marie Jackson, daughter

I love you and yes,
I know you prefer bottles over bytes right now, but someday...

Dr. John Gutowski

Dean of the School of Education and Psychology
Middlesex County College, Edison, NJ

Brief Contents

Introduction		Chapter 11	Multimedia Authorware—Creating Learning Tools A summary of the ways in which teachers can author their own learning systems
Chapter 1	Technology Use in Teaching and Learning: What's the Return on Investment (ROI) A presentation of the evidence supporting computer use in schools	Chapter 12	Funding Technology Projects A presentation of the ins and outs of raising money to fund educational technology projects
Chapter 2	Computer Hardware for K-12 Education An overview of the nuts and bolts of computing	Chapter 13	Computers, Education, and Society An overview of the ways in which computers are transforming the world in which our students live
Chapter 3	Software Systems for Microcomputers A discussion of the different types of software used with today's computing systems	Chapter 14	Assistive Technologies for Learning Looks at the various technologies that have been developed to make life easier for people, especially students, with disabilities
Chapter 4	Educational Computing Environments An examination of the issues and logistics involved in the establishment and integration of computers in schools	Chapter 15	Reflections on Education for an Information Age An examination of the theoretical validation of computer-based teaching and learning, and of the problems translating theory into practice
Chapter 5	Computer-Managed Instruction (CMI) The computer as a useful tool to aid the teacher in and out of the classroom		
Chapter 6	Computer-Assisted Instruction (CAI) An overview of the ways in which computer technology can help students' learn		
Chapter 7	Computers and Communications An examination of how computers and communications extend education's reach	APPENDICES	
Chapter 8	e-Learning and Information Literacy An examination of the pros and cons of the internet as a medium for doing education	Appendix	A History of Computers (PowerPoint)
Chapter 9	Education On-Line: Tools for Online Learning Reconciling the benefits of online learning with the challenge of using the Internet in the classroom	BIBLIOGRAPHY	
Chapter 10	Educational Multimedia A review of the power of technology to enrich the learning experience across the range of intelligences

Full Table of Contents

Introduction 1

- The Challenge of Change 1
 - The Need for Change 1
 - Teachers Make a Difference..... 2
- Objectives of the Text 3
- New in the 6th Edition 5
- Conclusion..... 6

Chapter 1 Technology Use in Teaching and Learning: What's the Return on Investment (ROI)..... 7

- Learning Outcomes 7
- Introduction 8
- Sources for research and other findings 9
- What general conclusions can we draw from the research?..... 10
- In what ways does digital (computer-based) technology enhance teaching and learning? 14
 - When used effectively, the computer is a valuable tool in support of learning ... 14
 - When used effectively, the computer is a valuable tool in support of teaching... 15
 - When used effectively, the computer is a valuable tool in support of children’s socialization..... 15
 - Computers and related technologies enable children with disabilities to integrate successfully into the education system..... 16
 - Software that is well designed to support learning enables a teacher to duplicate excellence 16
- Summary of research outcomes..... 17
 - The Three R’s 17
 - Science..... 24
 - Social Studies..... 25
 - Computer-assisted collaborative learning..... 26
 - One-to-one computing 26
- Why is it taking so long for schools to change?..... 27
- Computer-integrated teaching and learning: the Eight Pillars of Success 28
- Looking Back 30
- Looking Forward..... 30

Chapter 2 Computer Hardware for Education Environments..... 32

- Learning Outcomes 32
- Electronic Computers Were Invented to Meet Educational Needs..... 33

Chapter 7 Computers and Communications 189

- Learning Outcomes 189
- The Scope of Communications 191
 - Computers & Communications (C&C)..... 191
 - Technology Transfer and the Challenge Posed by User Demand 192
 - Explosion in End-User Computing 193
 - The Expansion of C&C in Schools 193
 - A Vision for the Future 195
- Computer Networks 195
 - Computers 195
 - Communications Channels..... 196
 - Modems and Fax/Modems 197
 - Other Communications Hardware and Software..... 198
 - Different Kinds of Computer Networks: LANs, WLANs,
WANs and MANs 199
- Applications of Computer Networks..... 202
 - Telecommunications 202
 - Hardware Device and Software Sharing 204
- The Case for Computer Networks..... 204
- Implementing Computer Networks 205
- Recommendations for Successful Introduction of Computer Networks
in Schools 207
- The Impact of Computer Networks in Education 208
- Home-School Communications 209
 - Schools Need Parents 209
 - Parents Need Help, too! 210
 - The Schools Must Take Responsibility..... 211
 - The Importance of the Student-Parent-Teacher Gestalt 211
 - The *TransParent School* Model 212
 - Outcomes of the *TransParent School* Model 213
 - Extensions of the *TransParent School* Model 214
 - The Importance of Choice..... 214
- Looking Back 215
- Looking Forward..... 216

Chapter 8 e-Learning and Information Literacy 217

- Learning Outcomes 217
- Reflections on the Learning Process 218
 - Data-Rich, Information-Poor..... 219
 - The Transfer of Data to Information is a Unique Individual Experience..... 220
- What is e-Learning? 222
 - Why e-Learning is Important 222
 - The e-Learning Environment 223

 Media Literacy..... 298
Using Copyrighted Materials 299
 Fair Use 299
 Some Suggestions 300
Model Schools..... 301
Looking Back 303
Looking Forward..... 304

Chapter 11 Multimedia Authorware—Creating Learning Tools..... 305
Learning Outcomes 305
Introduction: Programming Is Hard 307
Why Should Teachers Learn About Software Development? 307
 Some Historical Background on Programming Languages 307
 Knowledge is Power..... 309
Characteristics of Quality Authorware..... 309
 Quality Authorware puts the non-technical user's needs first 309
 Quality Authorware is crafted with care and is relatively bug-free..... 311
 Quality Authorware makes the computer appear to be almost human in its responsiveness and anticipation of user needs 311
 Quality educational software will eventually have to move to far more powerful computer systems than even those that are state of the art in classrooms today 312
Authoring Programs: How Teachers Can Get Involved..... 312
 KidPix Deluxe(KidPix 4)..... 314
 HyperStudio 315
 PowerPoint 316
 Night Kitchen's *TK3* 317
Programming on the Web 317
