1a. What is the area of your design project? Write 1 sentence broadly describing it.

1b. What specific aspects of this area or problem do you plan to explore/utilize in your design solution?

1c. Highlight the key terms in your responses above and add any additional terms you plan to use as initial search terms to begin your review of the state-of-the-art related to your project.

2. What types of engineering literature are relevant to your project (and to your audience and the purpose of your project)?

3. What research tools will you use to identify relevant information for your topic?

4. Attach citations to 5 sources that you think will significantly contribute to your project proposal, including a sentence or two on how each is relevant.

Names of team members:
