

Health Sciences Human Biological Materials Sample Collection/Tissue Bank

NOTE: All human biological samples collected and stored for research purposes, regardless of type or quantity, are to be reported using this form

1. Title of sample collection or bank:
2. Date when sample collection began or bank was established:
3. Responsible Principal Investigator or Custodian:
4. Will samples be utilized for future research: ____Yes ____No
5. Description of oversight/review process for sample distribution, if applicable:

6. Location of the collection or bank:
7. Describe the method by which samples are identified/labeled and stored:

8. Funding sources that supported the creation and support/supported maintenance of the collection or bank:

9. IRB Protocol Approval Number(s) and title of IRB Protocol(s) under which samples are/were collected:

10. Informed Consent Limitations: Please provide all relevant language from the informed consent under which the samples were collected, including any limitations on secondary use, and any provisions which address use of the samples for commercial purposes:

11. CORID Submission Number, approval date and title of protocol under which samples were collected:

12. Nature of the samples (e.g., blood, serum, urine, saliva, bone marrow, preserved tissue, including organs, and any tangible material isolated therefrom, such as DNA, RNA, and other biological substances):

13. Please list any other information accompanying samples:

Please submit this form to: Office for Oversight of Anatomic Specimens, Iroquois Building, Suite 302, 3600 Forbes Avenue; FAX: 412-647-1920; matusaksa@upmc.edu
