PART OF A MONTH-LONG CELEBRATION OF UNDERGRADUATE RESEARCH AND CREATIVITY

Department of Bioengineering Senior Design Symposium

April 18, 2008

2–4 p.m.

William Pitt Union (lower lounge)

During these presentations, bioengineering students present the results of their two-semester capstone senior design course efforts. This design course requires seniors in the bioengineering program to synthesize and extend the skills and knowledge acquired during their undergraduate education toward the design of a Food and Drug Administration regulation biomedical product.
