The Co-op Program is designed to provide students with relevant and challenging work experience. After the completion of their co-op rotations, students prepare a poster to discuss their co-op career, project assignment, education description and evaluation, career impact, and possible improvement in the workplace and/or the civil and environmental engineering curriculum.

Department of Civil and Environmental Engineering
Cooperative Education (Co-op)
Poster Session

April 18, 2008
Noon–1 p.m.
11th Floor, Benedum Hall (outside Room 1175)
