REQUEST FOR APPLICATIONS
The Department of Pharmacology & Chemical Biology
University of Pittsburgh School of Medicine

PREDICTORAL TRAINING PROGRAM IN PHARMACOLOGICAL SCIENCES

National Institutes of Health sponsored training grant seeks eligible graduate students. The objective of the Training Program is to provide students with an interdisciplinary predoctoral training experience in pharmacological sciences. The Training Program requires 32 credits of formal course work in any major graduate program within the University, participation in a seminar series, journal club, research-in-progress series, and a qualified ethics course. Applicants must be U. S. citizens or permanent residents. Students from underrepresented minorities, or who are disabled or from disadvantaged backgrounds are encouraged to apply.

Participating Faculty can be found at: http://www.pharmacology.us/

Preference will be given to PhD or MD/PhD applicants who are in the second or third year of their PhD graduate work. Prior to June 30, 2011, applicants should submit a 1-2 page summary of their proposed research indicating its relevance to pharmacological sciences, a letter of support from the proposed mentor, a curriculum vitae, and a copy of their undergraduate and graduate transcripts electronically to: phgradst@pitt.edu

Donald B. DeFranco, Professor
Department of Pharmacology & Chemical Biology

Successful candidates and their mentors will be notified in August. Faculty who are not members of this training program but are interested in joining are encouraged to contact Professor DeFranco.
