

Shikhar Uttam

CONTACT INFORMATION	Department of Computational and Systems Biology University of Pittsburgh 3064 Biomedical Science Tower 3 Pittsburgh, PA 15260 USA	<i>Phone:</i> (520) 223-5028 <i>Fax:</i> (412) 648-3163 <i>E-mail:</i> shf28@pitt.edu <i>WWW:</i> www.pitt.edu/~shf28
RESEARCH INTERESTS	Optics and computational imaging, signal and image processing, machine learning, early cancer detection and risk stratification, computational pathology, computational biophysics, spatial statistics and intra-tumor heterogeneity, radar signal processing, quantum information theory.	
IMMIGRATION STATUS	Permanent Resident (Greencard approved under outstanding professor and researcher category.)	
EDUCATION	University of Arizona, Tucson, Arizona USA Ph.D., Electrical Engineering, December 2010 (Minor: Mathematics) <ul style="list-style-type: none">• Dissertation Topic: “Compressive imaging for difference image formation and wide-field-of-view target tracking”• Advisor: Nathan A. Goodman M.S., Electrical Engineering, December 2006 <ul style="list-style-type: none">• Thesis Topic: “Computer-aided classification of benign/malignant microcalcifications in digital mammograms”• Advisor: Robin N. Strickland Jamia Millia Islamia (Central University of the Govt. of India), New Delhi INDIA B.S., Electrical Engineering, May, 2002	
CURRENT POSITION	<i>Research Assistant Professor,</i> Department of Computational and Systems Biology, University of Pittsburgh, Pittsburgh USA.	(November 2016- Present)
HONORS, GRANTS AND AWARDS	Co-investigator, grant: R01 CA185363, (May 2014 – April 2018), National Cancer Institute, National Institutes of Health. Co-investigator, grant: R01 EB016657, (May 2013 – April 2017), National Institute of Biomedical Imaging and Bioengineering, National Institutes of Health. Pitt Innovator Award, November 2014. (University of Pittsburgh award for technology innovation and translation.) Director’s Award for Scientific Excellence, University of Pittsburgh Cancer Institute (UPCI); for pre-clinical cancer research (2013). Outstanding Teaching Assistant Award, College of Engineering, University of Arizona. (Chosen from all engineering departments within the University of Arizona (2005-2006).) Graduate Tuition Scholarship Recipient, University of Arizona, (August 2006 - May 2010).	
EXPERIENCE	<i>Research Associate,</i> Department of Computational and Systems Biology, University of Pittsburgh.	(July 2016-October 2016)
	<i>Research Associate,</i> Department of Medicine, University of Pittsburgh.	(September 2013-June 2016)

Postdoctoral Associate, (October 2010–August 2013)
Biomedical Optical Imaging Laboratory,
Depts. of Medicine and Bioengineering, University of Pittsburgh.
Lab Director: Dr. Yang Liu

Graduate Research Assistant, (January 2005–September 2010)
Sensor and Array Processing Laboratory,
Electrical and Computer Engineering, University of Arizona.
Lab Director: Dr. Nathan A. Goodman

Graduate Teaching and Research Assistant, (August 2003–December 2004)
Teaching: ECE220 Basic Circuits,
Digital Image Processing Laboratory,
Electrical and Computer Engineering, University of Arizona.
Lab Director and Course Instructor: Dr. Robin N. Strickland

Research Intern, Image Analysis and Photometry, (May 2003–August 2003)
Steward Observatory, University of Arizona.
Lab Director: Dr. George Rieke

Graduate Teaching Assistant, (January 2003–May 2003)
NATS102 The Universe and Humanity: Origin and Destiny,
Lunar and Planetary Laboratory, University of Arizona.
Course Instructor: Dr. Tom Gehrels

Undergraduate Summer Intern, (May 2001–August 2001)
Center for VLSI Design and Prototyping,
Department of Electronics and Information Technology,
Govt. of India, New Delhi INDIA.
Lab Director: Dr. Debashis Dutta

Grader,
ECE435 Introduction to Digital Communication Systems (senior level undergraduate course),
ECE538 Radar Signal Processing (graduate level course)

STUDENT
SUPERVISION

Stephen Kita (TecBio 2013, a 10-week National Science Foundation funded undergraduate summer research program at University of Pittsburgh.)
Topic: Feature-based registration of histology images.

Nassima Bouhenni (TecBio 2017)
Topic: Probabilistic modeling of structure and dynamics of intrinsically disordered proteins.

TEACHING

BIOENG 1383/2383: Biomedical Optical Microscopy (Spring 2011, 2012, 2014, 2017)
Department of Bioengineering, University of Pittsburgh
(offered by Dr. Yang Liu)
Guest lectures on: Computational imaging and image analysis.

MSCBIO 2065: Scalable Machine Learning for Big Data Biology (Fall 2016)
Department of Computational and Systems Biology, University of Pittsburgh
(offered jointly by Drs. Chakra Chennubhotla and David Koes)
Guest lectures on: Sparse coding, compressive sensing, and graphical models.

PROFESSIONAL
MEMBERSHIPS AND
SERVICE

Member, *Institute of Electrical and Electronics Engineers* (IEEE),

Member, *Optical Society of America* (OSA),
Member, *SPIE*,
Member, *Society for Industrial and Applied Mathematics* (SIAM),
Member, *Association for Pathology Informatics* (API)

Reviewer, *Scientific Reports* (Nature research journal),
Reviewer, *Diagnostic Pathology* (BioMed Central),
Reviewer, *Computers in Biology and Medicine* (Elsevier),
Reviewer, *Methods* (Elsevier)
Reviewer, *IEEE Access*
Reviewer, *IEEE Transactions on Aerospace and Electronic Systems*,
Reviewer, *IEEE Transactions on Geoscience and Remote Sensing*,
Reviewer, *IEEE International Symposium on Circuits and Systems*(ISCAS, 2013),
Reviewer, *Journal of Optical Society of America A*, *Optical Society of America*,
Reviewer, *Optics Express*, *Optical Society of America*,
Reviewer, *Biomedical Optics Express*, *Optical Society of America*,
Reviewer, *Optics Letters*, *Optical Society of America*,
Reviewer, *Applied Optics*, *Optical Society of America*,
Reviewer, *Optical Materials Express*, *Optical Society of America*
Reviewer, *Journal of Biomedical Optics*, *SPIE*

COMPUTER SKILLS Languages: C, C++, Python, Java
Computational languages/packages: Matlab, Mathematica
Statistical packages: R
Operating systems: Linux, Windows

PATENTS AND TECHNOLOGY DISCLOSURES Spatial-domain low-coherence quantitative phase microscopy, US Patent App. 13/695,230; Publication date: Sep 5, 2013; Filing date: May 9, 2011.

(Depth-resolved) Spatial-domain low-coherence quantitative phase microscopy, US Patent App. 14/562,092; Publication date: Jun 11, 2015; Filing date: Dec 5, 2014.
