BA AFRICAN NETWORKS

The Bibliotheca Alexandrina (BA) follows in the footsteps of the Ancient Library of Alexandria as a meeting point for cultures and civilizations. It aims to rise to the digital challenge in order to develop African innovation through the use of science and technology in networks that extend throughout Africa.

The new goal set by the BA is to connect those with common interests and expertise to hasten the development of knowledge and enable immediate sharing of knowledge and contributions.

Euclid's Matrices

Welcome to the Euclid's Statistical Matrix! This is a Multilingual Dashboard designed to assist in the teaching and learning of the basics of statistics. The Matrix includes 4 excellent ebook by David Lane. It is also multilingual with an [Arabic Course by Dr. Serageldin](#) and an [Arabic RMLA](#). Videos from each series line up across the Matrix rows by student or teacher has difficulty with lecture on hypothesis testing video, they can look at videos on the same topic from other instructors. Each cell contains hyperlinks with the YouTube website. If one has difficulty understanding a statistical concept in class, they may try one or more of the following videos in the grid! Also, this greatly helps them can see 6 or more different ways that others have taught.

[Statistics Matrix in English](#) [Agricuture Statistics Matrix](#) [Farsi Statistics Matrix](#) [Japanese Statistics Matrix](#) [Russian Statistics Matrix](#)

The first column of the [Matrix](#) has been left empty; this allows for individual adaptation of the Matrix, where a lecturer may insert their own lecture materials (video, powerpoint, etc.) supercoursehelp@gmail.com

Developer of English Matrix - Curtis Tilves under the direction of Ronald LaPorte, Ismail Serageldin, Faina Linkov, Eugene Shubnikov and Francois Sauer, Supercourse and Library of Alexandria team

<i>Khan Academy (khanacademy.org) is a non-profit organization which utilizes a computerized blackboard to illustrate each step of a problem. "Our mission to provide a world-class education for anyone, anywhere."</i>	<i>Brandon Foltz has a masters in Education and a passion for sharing knowledge. "My videos are full-length lessons...so grab some coffee, tea, lassi, Apokat, sbiten', soo chunkwa...or whatever sounds tasty and relaxing."</i>	<i>These series of YouTube videos are brought to you by StatisticsLectures.com. "We focus on creating short, applied content with an emphasis on the logic behind various statistical methods."</i>	<i>David Longstreet from MyBookSucks.com through several statistical concepts. "The century tools to deliver education and learning."</i>

Farsi Team

Japanese Team

We have created the Euclid matrix in Arabic, English Farsi, Japanese and Russian. Statistics is a difficult topic to learn, having to learn it in a second language (e.g. English) doubles the difficulty. Therefore this helps people to learn it in their native tongues.

We built the Serageldin-Euclid research methods library first by collection >5000 virtual materials. Then Mary Shann offered 2000 of her books, and we reached out to the research methods community who were extremely generous. Fritz Scheuren was extremely helpful in reaching out to the statistics and research methods community. The books were shipped to NYC, and then taken by containership to Egypt

The staff at the library were incredible for arranging the transport of the books. About 6711 books arrived safely and will shortly be put into the permanent collection for all to use. The donors of the books will be part of the library, with Euclid for at least 300 years. The move has been captured on a beautiful video (see September).
