

TinyOS in Crossbow Motes

Presented by: María Calle

Agenda

- Recap
- What's new?
 - Integration Development Environment (IDE)
 - Simulation Tool (TOSSIM)
 - About the motes
 - Sleeping Blink
 - Sleeping Radio?

Recap

- TinyOs is a "different" OS
- All we load in the mote is one executable file
- Tasks: execution can be deferred
- Hardware event handlers: interruptions. execution preempts tasks or other hardware event handlers.
