Article citation reaches 133

ISI Web of Knowledge indicates that one of our papers (Li et al. 1998*) has reached 133 citations since its publication in 1998. In general, a paper that has been cited more than 100 times within 5-10 years after publication has made a significant impact. The study approached the "motor redundancy problem" using human fingers as a model

* Li ZM, Latash ML, Zatsiorsky VM. Force sharing among fingers as a model of the redundancy problem. *Experimental Brain Research* 119(3):276-286. 1998.
